

7 September 2023

**Chariot Limited**  
("Chariot", the "Company")

**Annual General Meeting**

As previously announced on 28 June 2023, Chariot (AIM: CHAR), the Africa focused transitional energy group, will hold its Annual General Meeting ("AGM") today at 11.00 am at the May Fair Hotel, Stratton Street, London, W1J 8LT.

Once the formal business of the AGM has concluded, management will go through an AGM presentation which will be followed by a Q&A session and refreshments. The presentation will duly be made available on the Company's website.

**Adonis Pouroulis, CEO, Chariot Limited, commented:**

*"We look forward to welcoming our shareholders at the Company's AGM this morning and giving an update on the Anchois development project, our plans for the Loukos Onshore licence as well as an overview on the latest progress across our Transitional Power and Green Hydrogen pillars."*

**NOTES FOR EDITORS:**

**About Chariot**

Chariot is an Africa focused transitional energy group with three business streams, Transitional Gas, Transitional Power and Green Hydrogen.

Chariot Transitional Gas is focused on a high value, low risk gas development project offshore Morocco in a fast-growing emerging economy with a clear route to early monetisation, delivery of free cashflow and material exploration upside.

Chariot Transitional Power is focused on providing competitive, sustainable and reliable energy and water solutions across the continent through building, generating and trading renewable power.

Chariot Green Hydrogen is partnering with Total Eren and the Government of Mauritania on the potential development of a 10GW green hydrogen project, named Project Nour.

The ordinary shares of Chariot Limited are admitted to trading on the AIM under the symbol 'CHAR'.
